

# CIRCIT COMBO STATION® SELF-CHECKOUT SYSTEM

- *Touch screen monitor for patron convenience*
- *Item checkout in four quick, simple steps*
- *User interface that you design to fit your patrons' preferences*
- *Resides on circulation desk with dual monitor screens for easy assistance by staff*
- *Uses CircIT: feature-rich self-checkout software*
- *Choice of RFID or barcode technology*

Place the patented CircIT Combo Station Self-Checkout System on your circulation desk so staff can easily assist patrons. Thanks to the Combo Station's location and dual screens, staff can assist without leaving the circulation desk and without ending the patron's session.

#### **Included: CircIT**

The Combo Station Self-Checkout System is powered by CircIT, the most powerful, flexible, and feature-rich library self-checkout software available. CircIT includes unlimited HTML-based customization features. You can configure self-checkout stations to read both RFID tags and barcodes; perform circulation functions; and read and write RFID tags. CircIT includes customizable reporting, receipts, screens, and processes.

#### **Optional Personal Payment System**

The Personal Payment System (PPS) is an in-desk "service center" that enables patrons to pay fees or fines. They can use the optional Smart Card with stored cash value or pay with cash. Your library can also associate the patron's library card with an account on your library's server.
