

ez tag system

Tech Logic has created the EZ Tag System for easy, on demand RFID tagging of your collection. You can print your library's name, ID, and logo, and a barcode, while encoding and verifying RFID single and multiple labels, all in one step.

You control the look of your labels, and the system retains your label artwork whether you are using it in a backroom or in the stacks.

You can batch load barcodes into the EZ Tag System for instant production of multiple tags, or you can program and print single tags. Either way, the EZ Tag System encodes the tags for you, eliminating the need to pass each tag over an RFID antenna for encoding.

When your conversion from barcodes to tags is complete, the EZ Tag system easily converts to a staff tag programming station for newly acquired items. The EZ Tag System has everything you need to perform tagging operations.

features

- High frequency RFID label printer
- Tech Logic's lightweight stainless steel EZ Wheel Tagging Stand
- Barcode scanner with flexible stand
- Dell laptop and laptop lock
- Tech Logic's tagging software with a one year warranty and license

An optional six to eight hour Smart UPS power supply is also available.

easy to use

Just scan the book's existing barcode label and the Tech Logic EZ Tag System takes over. The printer prints your complete label with an encoded RFID tag that matches your barcode information. Single labels are presented to the operator with the label's backing liner removed and ready to apply to your book.

compact functionality

The Tech Logic EZ Tag System comes with a lightweight stainless steel wheeled stand and laptop. The EZ Tag System is easy to set up and portable. You can move the stand to different locations depending on your staff's needs, making it convenient to tag your library's collection almost anywhere. The EZ Tag System's portable design allows the entire assembly to be shipped via UPS.

ez tag system

specifications

Tech Logic Part Number: 45006742
 Power requirements: 120 V, 60 Hz,
 3.3 FLA (Full Load Amps), 396 Watts

Features

- High Frequency RFID label printer/encoder
- Dell Laptop
- Laptop lock, MicroSaver Security Cable
- USB barcode scanner with flexible stand
- Stainless Steel Wheeled Stand

Label specifications

Capable of printing on paper or synthetic label stock
 Print labels up to 4 in. (101.6 mm) wide
 Label Lengths: 2 in. (50.8 mm), 4 in. (101.6 mm),
 or 6 in. (152.4 mm)
 Capable of printing all symbologies

Stand:

- laptop platform
- printer platform/post
- wheeled base

Printer specifications

12.51 in. (317.8 mm) x 18.83 in. (478.3 mm) x 16.37 in. (415.8 mm)
 46.6 lbs (21.1 kg)
 Print resolution: 203 DPI, 300 DPI
 Printing method: Direct Thermal
 or Optional Thermal Transfer
 AC Input Voltage: 90-132
 or 180-264 VAC @ 47-63 Hz, auto-ranging
 Operating temperature: 32° F -- 100° F (0° C to 38° C)
 Humidity: 10% -- 95% non-condensing

Equipment

- laptop
- barcode reader and stand
- RFID printer

Parts/Tools:

- Laptop lock and keys
- Ethernet cable
- Extension cord
- 5/16th " Allen wrench
- Thumbscrews
