

media passport

Theft Protection

Libraries have a significant investment in digital media, and protecting that investment while allowing easy patron access has been a challenge for many libraries. Tech Logic created a solution which allows a library to help protect this investment and streamline the patron check-out experience.

CircIT Media Passport stops theft of media items like CDs and DVDs. Using Kwik-Case™ security cases and RFID, the item information is logged at check-out. Media Passport confirms the correct item before unlocking the case.

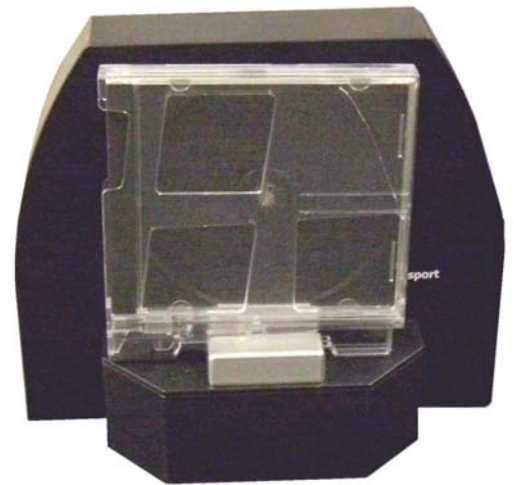

CircIT Integration

The Media Passport integrates the CircIT automated check-out patron interface with the activation of the magnetic keyless security cases.

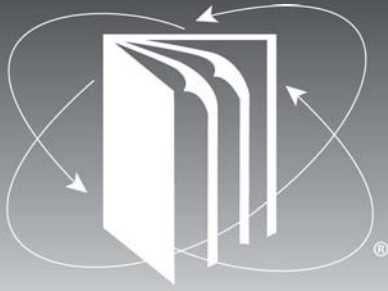

Secure Media Check-Out

With Secure Media Check-Out, a routine check-out transaction activates the Media Passport to magnetically release the locking pin, allowing the library patron to remove the media item from its security case. The opener senses items on it and activates, and the patron can remove items from the case.

techlogic
specifications

media passport

dimensions

- Height: 8.5"
- Width: 10.0"
- Depth: 5.75"

communication

- Antenna Integrates with PC via USB
- PC Integrates with Relay Module via USB
- WDT automatically turns Media Passport off when communication is disrupted

antenna

- Frequency: 13.56MHz
- Antenna Size: 103.2 x 73.1 x 24mm
- Consumption: 3.6W @ 24V DC
- RF Output Power: 500 mW
- Compliance: FCC/CE/TELEC

relay module

- Type: DPDT with WDT

power supply

- 24VDC, 2.5A

mounting

- Bolted to Countertop

supplied components

- Media Passport
- USB Cable
- 24VDC 2.5A AC Adaptor
- Manual

color

- Black

operating temperature

32°F to 104°F / 0°C to 40°C

Tech Logic part number

45007202
