

# PAYSTAND PAYMENT SYSTEM

- *Seamless self-checkout*
- *Credit card payments!*
- *Bill validator*
- *U.S. and Canadian currency*
- *Coins and coin return*
- *Easy installation*

## **Design Innovation and Self-Service Technology**

Tech Logic combines design innovation with self-service technology for its newest fine payment device, the PayStand. The PayStand is a self-service, standalone payment system that communicates with Tech Logic's CircIT self-checkout system for up-to-date patron account information.

The PayStand features rugged and reliable technology inside its sleek and simple housing. The unit's unique look and flawless design allow subtle integration into your library's decor. Or, as a standalone piece, the PayStand's bold minimalism creates a distinctive, featured point of interest. Choose a black or silver finish to match or contrast with your library's look.

## **Self-Contained Unit**

The PayStand eliminates the need for patrons to go to the self-checkout station to pay fines or fees. It allows patrons to pay and go, while it keeps the self-checkout area free and spares staff from having to assist with payments. Put the PayStand anywhere in your library to encourage patrons to use it.

## **Easy Payment and Installation**

The PayStand accepts payment via cash, Smart Card, or a credit card. Patrons can also use their library cards, which can be associated with an account at your library.

The PayStand is easy to install with simple USB connectivity for credit card and currency transactions. It will accept U.S. and Canadian currency in one dollar, five dollar, and twenty dollar denominations.
