

Combo Station

Integrate the patented CircIT Combo Station Self Check-Out System on your circulation desk so that staff can easily assist patrons. Thanks to the Combo Station's location and dual screens, staff can easily assist patrons without leaving the circulation desk or ending the patron's session.

Included: CircIT™

The Combo Station Self Check-Out System is powered by CircIT, the most powerful, flexible, and feature-rich library self check-out software available. CircIT includes unlimited HTML-based customization features. You can configure self check-out stations to read both RFID tags and barcodes, perform circulation functions, and read and write RFID tags. CircIT includes customizable reporting, receipts, screens, and processes.

Optional Personal Payment System

The Personal Payment System is an in-desk "service center" that enables patrons to pay fees or fines. Patrons can pay with cash, coins, or credit card.

Features

- Touchscreen monitor for patron convenience
- Item check-out in four quick, simple steps
- Customizable user interface to fit your patrons' preference
- Resides on circulation desk with dual monitor screens for easy assistance by staff
- Uses CircIT: feature-rich self check-out software
- Choice of RFID or barcode technology
